

AT-HOME HEALTH MONITORING

Monitor your overall health remotely without having to visit the office or the laboratory.

Many medications have side effects on your physical health. Although these are less common, it is important that your doctor is able to look out for these. Your prescriber will get an update on your physical health every month to provide you with a tailored treatment plan.

HOW IT WORKS

1

Athelas will ship you a box with connected health devices and train you on how to use them.

2

Athelas will text you on a monthly basis, reminding you to test your vitals (i.e. blood sugar, weight, and blood pressure).

3

Your test results will be sent directly to your doctor. Your doctor will be alerted if anything looks out of the ordinary that they may need to follow up on.

WHAT TO EXPECT NEXT

A member from the Athelas Onboarding Team will call you in the next few days to see if you are interested. If interested, the Athelas Staff will ship devices to you and contact you to schedule a time for a quick training.

Insurance Coverage

Athelas Services are fully covered by your insurance with no out of pocket cost or copays.

Currently available to patients on Medicare and Commercial Insurance Only
